1B/ DESIGN

DESIGN YOUR PRECISION HIGHLIGHTS

- The cap is divided into sections to create Precision Highlights throughout your hair or only in certain areas.
- The number, thickness and placement of the strands will determine how dramatic your final result will be.
- To pull hair strands through the holes, place the plastic hook flat against the cap, slip the hook through a hole in the cap, then gently pull the hook straight out.

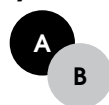

FACE FRAMING HIGHLIGHTS

The hairline section of the cap highlights the entire front of the head from the ear to ear.

ALL OVER HIGHLIGHTS

The hairline and crown sections of the cap gives all over highlights. For additional highlights you can also use the back section.

2/ APPLICATION OPTIONS

FACE FRAMING HIGHLIGHTS OR ALL OVER HIGHLIGHTS

APPLY

Using the spatula, apply the mixture to the hair, saturating all the strands with the mixture. Save any unused mixture in case you need to reapply after checking a strand.

COVER HAIR

Pile your saturated hair loosely on top of the cap and cover with the clear plastic over cap. Twist overcap at the front and fasten tightly with a plastic hair clip.

RELAX

Leave on for 10 minutes. Check the progress of your highlights. Wipe a strand with a damp paper towel and check the shade. If the hair strand has not reached the desired level of lightness or has any unwanted red or gold tones, reapply the highlighting mixture to the same strand and continue checking every 10 minutes until you reach the shade you want, up to 60 minutes.
